

SILVER COIN

Age of Monster Hunters

# SCENARIO BOOK

VERSION 1.0.9 25/11/2021

# INTRODUCTION

Welcome to the Silver Coin: Age of Monster Hunters Scenario book. The purpose of it is to enable you to learn how to play the Solo and Cooperative game modes and guide you through the scenarios we have prepared for you.

A lot of the game play elements and phases of play will be similar for both game modes as also for the specific scenarios, but wherever there will be differences and special rules it will be mentioned under the specific rules for those scenarios.  
Before reading the Scenario book, please read the Rule Book and the general set up of the game, as here we will refer to those two and mention the differences where needed.

One final thing. As we have created this giant and rich world for you to explore, different scenarios have enabled us to tap more into the lore of the game and focus on specific events and challenges that the land and its inhabitants have to face.  
Each scenario will present you with a puzzle like riddle you will have to solve to successfully complete its objectives. Whether on your own in a Solo mode or as a team in Cooperative mode. We wish you good luck and hope you will have half as much fun when figuring out the answers, as we did when creating the Scenarios themselves.

Good luck hunters!

## SCENARIO GAME MODE

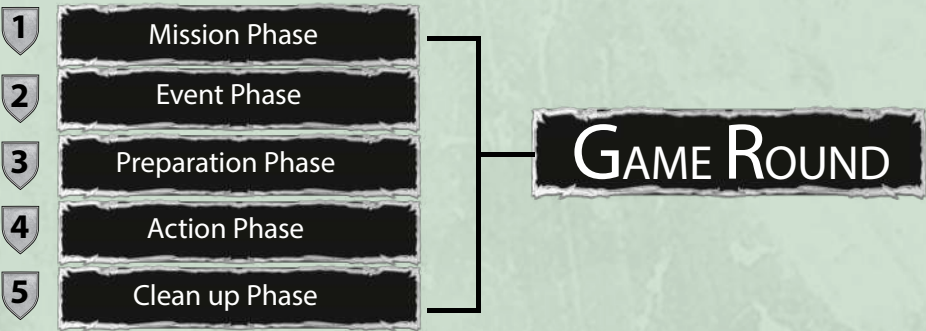

Before you jump into one of the two possible Scenario Modes (Solo or Coop), let us take a look at some general rules and a general overview of Scenario Mode game play.

## Game Setup Specifics

- 1 No Auction Phase
- 2 All Season cards are replaced with Scenario Specific Event cards.
- 3 Special setup rules as per Scenario Instructions

## Game Phases

As mentioned under Game setup in Scenario mode, there is no Auction phase, there is also no end game Scoring phase. There are in total 5 game phases that also form the phases of each Game round. They are as follows:

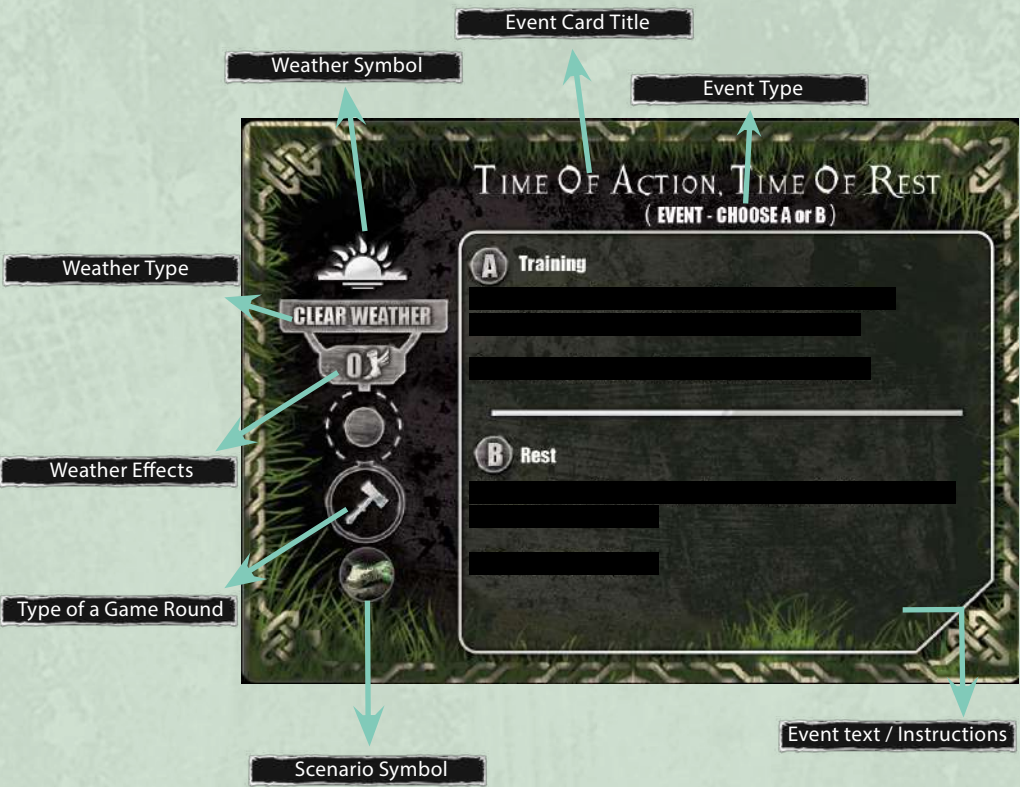

### 1 Mission Phase

Flip over a Mission card from the Mission card deck and add it to the Tavern Board as per Scenario's instructions.

### 2 Event Phase

Move the Weather Tracker Token to the next position on the Weather Card and / or flip new Event Card and read its instructions. These Event cards together with specific Scenario rules, winning and losing conditions, are the heart and soul of each scenario. They will vary from game to game and for each scenario.  
Let us take a closer look at a **Scenario card** and its elements.

### 3 Preparation Phase

This phase will work as per the general game rules unless Scenario says otherwise.

#### 4 Action Phase

This phase will work as per the general game rules unless Scenario says otherwise, with one exception!

##### BIDDING ROUND

There is no “bidding” during the Bidding round, instead the players need to put their Action Token on a specific blue action spot next to the Improvement cards. That will cost 1 experience cube to execute and will allow the players to pick one Improvement card from the tableau. After which they will discard the rest of the Improvement cards and reveal the new Improvement cards (number depends on the player count) which they will be able to gain during the next Bidding round.

#### 5 Clean up Phase

This phase will work as per the general game rules unless Scenario says otherwise.

## Winning and Losing Conditions

Each scenario will have its own Winning and Losing Conditions. Keep them in mind when playing. If they are met, the game will end and players will be victorious or they will suffer defeat.

## SOLO GAME MODE

Each scenario that can be played solo will be accompanied by the following symbol:

Sometimes there are paths we need to walk alone...

The success of your missions will completely be up to you hunter. There is no one to rely on. That may be a burden, but it can also be liberating. You yourself, will be the master of your faith.

There are no specific rules for solo mode, when you have read the General game rules and the general Scenario game rules you are ready to start your first Solo game. Remember each Solo scenario will have its own set of rules you will need to follow in order to play it.

## COOPERATIVE GAME MODE

Each scenario that can be played cooperative will be accompanied by the following symbol:

You will join forces with your fellow Monster Hunters in order to complete various Scenarios and missions that await you. You will have to decide when it is best to travel as a company and when to go on separate paths. When to fight together and when to stand alone. In Cooperative mode you will have to strike and find the right balance in order to emerge victorious.

Below there is a set of Rules specific for the Cooperative mode which will together with the General game rules, General Scenario Game Mode rules and Scenario Specific rules tell you how to play the Coop game.

#### 1 Movement

Players may move together. When players are travelling together or performing actions together they are called a company.

This can be result of an action, ability or played Kingdom cards.

In order to move together the Active player must pay 1 physical flow to “bring” other players along. Max movement is always that of the active player, no matter the movement points of other Characters. At the same time if other Characters have less movement points than the active players then that is the furthest point to which they can travel.

The active player may “drop” other Characters as they are moving, however they cannot “pick them up”. In order for players to move together they must ALWAYS begin the turn at the SAME location.

Players may move together via Sea as well, but each must pay for their own Sea trip.

Players may move together through the hidden paths, via teleporting... as long as the ACTIVE player is able to use them.

When weather is affecting the movement or resources need to be spent for it, all players are effected and need to spend them.

If one of the players within the company is able to negate the effects of the weather, the weather is negated for all the members of that company.

#### 2 Kingdom Knowledge

Each Character has their own Kingdom Knowledge however in times of battle if battling as a company the Kingdom knowledge of all the members of the company is considered combined. Example:

If a Character A has 1 Kingdom Knowledge token

and a Character B has 2 Kingdom Knowledge tokens

If battling together they would be considered to have a total of 3 Kingdom Knowledge each and thus the monster above would gain no bonus for the battle.

If on the other side 2 of the 3 tokens were from the same Kingdom, the total Kingdom Knowledge would still be 2.

#### 3 Battle

When battling a monster as a company add 1 health point to the total health points of a monster for each member of a company.

When battling as a company each Character will have to calculate the strength of the monster for themselves as if battling the monster alone. Thus if a Character A drinks a strength potion that bonus will be applied only to them, same with any bonus for magic or items they may possess.

The only difference is the above mentioned Kingdom Knowledge.

The player 1st in turn order will start the battle.

After applying the battle round results the next player in turn order will do the same and so on until the monster is defeated or all the players flee or are defeated.

Players may decide to flee the battle before the battle round (roll of the dice)

The remaining players will resume the battle as normal.

Once the battle is finished the COINS are split among the players in a manner the players see fit.

Each player gains amount of experience written on the Monster card.

Each player advances on the World Reputation track for the amount of reputation written on the Monster card.

Players advance together on the Bonus Reputation track for the amount of reputation written on the Monster card (does not add up for each player separately).

If a player has run from the battle they get no share of the rewards or any experience or reputation. If one of the players is defeated the battle or even Scenario is/may be lost.

Protection Magic is the only Magic that can be activated on another player's battle round thus negating the potential damage that player would receive.

4

## Reputation Tracks

The World Reputation Track works same as per General game rules. Bonus Reputation Track is however different. There is only one Player's token on the Bonus Reputation Track. Players are moving that token together. Every single time a player receives reputation they will advance on the Bonus Reputation Track. The only exception here is after the battle, players will advance only for the total amount of points as written on the Monster card.

Once the players reach the Bonus Reputation Token spot they can decide which player will receive the Bonus Token.

5

## Abilities

In a cooperative mode, players may combine their Character's abilities and create interesting combinations. For example if Natural Chaos Character is moving with the company, the company may travel through his portals.

6

## Sharing items

If characters are located at the same location they may share/exchange certain items. In order to do so, the player must execute a location action. That action can be used for other things, but part of that action can be used for sharing/exchanging items. Players may share/exchange only coins or potions.

7

## Mission and Event Phase

On a Mission Phase no matter the number of players, players only draw 1 mission card, unless Scenario instructs differently.

If there are decisions to be made, players decide on them together.

During the Event phase if there are decisions to be made, unless an Event says otherwise, players will always make decisions together.

# Scenarios

## OLM INFESTATION

Scenario Icon

Scenario difficulty

Number of Players: (1)

## PROLOGUE

"We call upon your services, oh, monster hunter. The 3 kingdoms of Lys Blanc, Abaris and Fabula, have seen a sudden spike in Olm sightings as of late. These Creatures are no real threat for the likes of you, we are sure, but to the ordinary citizens of 3 kingdoms they are a nightmarish image as you may imagine. What is more they are polluting the water sources with their poisonous secretions and we are fearful that they may even spread to the other kingdoms if they would be allowed to reach the open ocean waters. Failure will not be tolerated, we know your kind does it for coins, but it is more at stake this time around. Good luck!"

## INTRODUCTION

Times are dire for the three Kingdoms and you are tasked to slay the Olms infesting the lands. Beware of the poisonous areas spreading throughout the land, carefully plan your starting location and help the frightened populace.

**Playable Kingdoms:** Fabula, Lys Blanc & Abaris

**Playable Characters:** Natural Chaos, Rider

**Starting Location:** Mantygern (capital), Lillac (capital) or Lemuria (capital)

## Winning Conditions

You win the scenario if you achieve all the following winning conditions:

- Have max health and no Poison Tokens
- Defeat X amount of Olm monsters

**a)** Easy lvl (defeat 5 Olm monsters)

**b)** Normal lvl (defeat 6 Olm monsters)

**c)** Hard lvl (defeat 7 Olm monsters)

## Losing Conditions

You lose the scenario if one of the following happens:

- Lose all health in battle
- Can't draw a Mission card
- If discarding X amount of Olm Missions

**a)** Easy: If 4th Olm Mission is discarded

**b)** Normal: If 3rd Olm Mission is discarded

**c)** Hard: If 2nd Olm Mission is discarded

## Setup Specifics & Rules of the Scenario

### 1) Monarchs

- Shuffle and randomly place Tax Monarch, Ban Monarch & -10 coins Monarch in the 3 playable Kingdoms.

### 2) Townsfolk

- Shuffle and randomly place Plague Doctor, Horse Merchant & Monster Hunters Townsfolk cards in the 3 playable Kingdoms.

### 3) Herb Cards deck

- Remove all herb cards not belonging to the 3 playable Kingdoms to form your Herb Cards deck. Randomly reveal and put 4 of them face up (limit of max 2 per Kingdom still applies).

### 4) Bonus Reputation Track

Place the Magic Bonus Token at the end of the Bonus track.

### 5) Improvement Cards

- Create an Improvement Cards Deck (Helmet of Lys, Path Through the Mountains, Path Through Marshes, Seeker of Knowledge, Ancient Knowledge, Shield of Gerin, Magic Crystal, Chakram, Training, Healing Magic, Things get Dicey, Black Ring, Troubadour).  
- Place 2 of them Face up

### 6) Starting Resources, cards and location

- 110 coins
- 2 Exp cubes, 1 Physical Flow cube, 2 Magical Flow cubes
- Protection Magic
- Starting Kingdom Knowledge = 0
- 1 Antidote/Poison Potion
- Starting location: Pick one of the 3 capitals of the playable Kingdoms

7) Tavern Area & Mission cards deck

a) Prepare Mission cards deck

- Form the deck with only cards from the 3 playable Kingdoms
- Remove from it the following 9 Olm Mission cards:

Fabula (Red) = 1. **Lydia**, 2. **Medea**, 3. **Cataleption**

Abaris (Yellow) = 1. **Gilgamesh**, 2. **Etana**, 3. **Lagash**

Lys Blanc (Green) = 1. **Edelweiss**, 2. **Pistia**, 3. **Fressia**

- Place 9 Olm Mission tokens on those 9 locations on the map (INACTIVE SIDE up)
  - Randomly remove 1 of the 9 Olm Mission cards, place the rest of the 8 face down. They form the Olm Missions deck.
  - Take the rest of the Mission cards of the 3 Kingdoms shuffle and randomly take the number of them depending on the scenario level: **Easy 12, Normal 10, Hard 7**
  - Shuffle them together with the 8 Olm Mission cards to form the Scenario's Mission card deck.
- Depending on the level of difficulties the final deck should contain.

**Easy lvl: 20 Mission Cards**

**Normal lvl: 18 Mission Cards**

**Hard lvl: 15 Mission Cards**

b) Prepare the Starting Missions

- Out of the Scenario's Mission Cards deck now draw 3 random Mission cards and place them on the Tavern Board as normal.
- For any non-Olm Mission card drawn place a Poison token on its location on the World Map.
- If in the Kingdom with the Monster Hunters Townsfolk card more than 1 Mission card has been drawn, draw a new card and reshuffle the ones you were not able to put on the Tavern board back into the Mission cards deck.

PLACEMENT RULES:

- **Whenever a new Mission card is drawn**

1st always check if the location on it is an Olm Mission or not (check above, for the Olm mission cards locations) – if it is, flip the Olm Mission Token to its active side on the World Map. This will indicate that the mission is now active and that the player can go and battle the monster. If the Mission card is not an Olm Mission add the Poison Token on its location on the World Map instead.

- **When adding the Mission card to the Tavern board**

normal placement rules apply, however with 1 exception. If the there is no more spots on the Tavern board to place a Mission card, instead of discarding it as per general rules, the Mission card gets placed on the rightmost position on the Tavern Board, pushing any leftmost Mission cards off the board to be placed in the Discard pile.

If the discarded Mission card is also an Olm Mission. 1st check the Losing Conditions and if the game is not lost flip the Olm Mission token to its inactive side.

8) Missions

- The only monster missions in this scenario are Proteus Olm monster cards.
- They can be fought by executing Location action on one of the ACTIVE Olm locations on the map.
- You do not need to go to the Capital to collect your missions.

9) Poison Tokens

In this scenario Poison Tokens will get added to the map. When a character is passing or stops at the location one Poison Token per such a location will be added on a character-s card. Effects and removal of the Poison Tokens are as per general game rules. Remember that you cannot win this scenario if your character is poisoned.

10) Travel

Character cannot travel outside of the borders of the 3 kingdoms.

# ASHGAR PLAGUE

Scenario Icon

Scenario difficulty

Number of Players (1-3)

## PROLOGUE

*Oh mother have I came too late  
to save your dying soul?  
They need not tell me twice for I  
will answer thine call.  
I should not left you long ago...  
Should stayed right by thine side  
Would change the story thee will tell  
Of me and my cursed pride...  
Do not falter, I will come  
Do not fear the dark  
Here it is inside of me...  
I can feel the spaaark  
Ohhhh Ohhhh Ohhhhh Ohhhhh  
Ohhhh Ohhhhh Ohhhh Ohhhh  
Sleep now peacefully,  
I have you in my arms  
None will come I promise thee  
She'll suffer no more harms*

## INTRODUCTION

We are spinning back the tides of time and revisiting events not long ago after the Great Calamity that has struck the land. In the south, in an old city of Ashgar, men have tempered with the unknown. The order of Natural Chaos has disturbed what must not be disturbed, unleashing the unthinkable in the process. Land has not seen such a spike in flow since the days of forgotten and results are starting to show.

Resist the flow, or guide it towards your cause, for resisting it completely may prove to be just as fatal. Answer the call of the south and defeat the monstrosities that lay there.

**Playable Kingdoms:** All

**Playable Characters:** Natural Chaos, Seeker, Shapeshifter, Rider

**Starting Location:** York (capital)

## Winning Conditions

- Defeat the 3 monsters as per Scenario's objective.

## Losing Conditions

You lose the scenario if one of the following happens:

- Lose all health in battle
- Can't draw a Mission card
- Can't draw an Event card
- If character is corrupted by Flow

## Setup Specifics & Rules of the Scenario

1) Monarchs

- Place the Clairvoyant King in Morahan (Purple).
- Shuffle and randomly place 5 other Kings in the remaining 5 Kingdoms.

2) Townsfolk

- Shuffle and randomly place Plague Doctor, Librarian & Monster Hunters Townsfolk cards in the Kingdoms of Lys Blanc (Green), Fabula (Red) and Abaris (Yellow).  
The rest of the Kingdoms do not receive designated Townsfolk cards.

3) Improvement Cards

- Create an Improvement Cards Deck (Path Through the Desert, Path Through the Mountains, Freezing the Water, Expert Tracker, Legendary Sword Durendal, Armour of Ren, Seeker of Knowledge, Burning the Forest, Healing magic, Precision Strike, Ancient Knowledge, 3x Surprise Attack, Poisoned blades, White Ring, Black Ring, Devil's potion, Supreme magic, Studied the creature, Wrist crossbow)  
- Place 3 of them Face up (no matter the number of players – place 3 face up when placing new ones as well).

4) Starting Resources, cards, knowledge and location per character

- Starting location for all the Characters is York the capital of Jorvik.  
- All Character start with 3 less health.  
- Randomly draw as many Journey cards as players + 1, each player chooses one in turn order.  
- Randomly draw as many Kingdom Knowledge Tokens as players + 1, each player chooses 1 in turn order.  
- 150 Coins.  
- 1 Exp. cube.  
- 1 Strength Potion, 1 Antidote/Poison Potion (each character) .

5) Monster Objective Deck

- Create 4 separate Monster decks depending on the difficulty level:

a) Easy

- 1st deck containing (3x lvl 1 M. cards)
- 2nd deck containing (4x lvl 1 M. cards)
- 3rd deck containing (3x lvl 1 & 2x lvl 2 M. cards)
- 4th deck containing (1x lvl 2 M. card)

b) Normal

- 1st deck containing (2x lvl 1 M. cards)
- 2nd deck containing (3x lvl & 1x lvl 2 1 M. cards)
- 3rd deck containing (1x lvl 1 & 3x lvl 2 M. cards)
- 4th deck containing (1x lvl 3 M. card)

c) Hard

- 1st deck containing (1x lvl 1 & 1x lvl 2 M. cards)
- 2nd deck containing (2x lvl & 2x lvl 2 1 M. cards)
- 3rd deck containing (3x lvl 2 M. cards)
- 4th deck containing (1x lvl 3 M. card)

Shuffle each deck separately and stack them on top of each other in the reverse order 4th to 1st (bottom being the 4th) thus forming the **Mission Objective deck**.

Only when both the Mission's objective LOCATION and its matching Monster card are revealed, can the player battle each of the 3 Mission Objective Monsters.

6) Mission Cards deck & Missions

- Create a Mission Cards deck

Take all the Mission cards and from them remove all Morahan (Purple) Mission cards.  
From those remove random 3 cards (without looking at them) and place them face down on the bottom 3 places on the Tavern Board (reserved for Morahan Mission cards).  
From the rest of the Morahan Mission cards randomly draw 8 Mission cards and place them face down to form their own Morahan Mission cards deck. Discard the rest of the Morahan Mission cards, you will not be needing them for this game.

Take the rest of the Mission cards (of the other 5 kingdoms) and randomly take 13 Mission cards (without looking). Discard the rest.

From those remove 2 Mission cards and place them faceup on the Tavern Board as per game's rules.  
If both happen to be from the Kingdom containing the Monster Hunters Townsfolk card draw a new card and reshuffle the one you were not able to put on the Tavern board back into the Mission cards deck.

Now shuffle the remaining 10 Mission cards (from the 5 Kingdoms) together with the 8 Morahan Mission cards to form your Scenario's Mission cards deck.

- Revealing the 3 Mission Objective LOCATIONS

The 3 Mission cards placed facedown on the Tavern Board are representing the 3 Mission Objective Locations where players will be able to fight the 3 Monsters they need to defeat in order to win the Scenario.

They will get revealed as per the following rules:

1st Mission Objective Location immediately before the beginning of the 4th game round.

2nd Mission Objective Location immediately before the 7th game round.

3rd Mission Objective Location immediately before the 10th game round.

- Rules for Placement of Mission Cards on the Tavern Board.

Each time a new Mission card gets revealed one of the following things will happen

a) If the Mission card is of the Kingdom that has no remaining space for additional Mission cards on the Tavern Board the Mission card gets immediately discarded and a new Mission card is drawn.

b) If the revealed Mission card is Morahan's (Purple) Mission card, players have to 1st place 1 Flow cube on the matching location on the World map and then can place the Mission Card on any empty spot on the Tavern Board. However players CANNOT complete missions from such Mission cards.

- Rules for Completing regular Monster Missions or Mission Objectives

There is always 1 faceup lvl 1 monster on top of the lvl 1 Monster cards deck. It represents the current monster players can battle if they take up any of the Missions the kingdoms are offering.  
If that monster is defeated, immediately a new one is drawn and placed faceup back on top of the lvl 1 Monster Cards deck.

Players may battle the monster immediately when they arrive at the location of the mission, they do not need to go to the Capital to gather the mission.

Once a Monster Mission is completed, immediately gain rewards and remove the Monster Mission card, thus freeing up 1 space on the Tavern Board. That can be really important!

If players reach a revealed location of the Mission Objective as long as its matching Monster is revealed they may battle it.

EXAMPLE of a Mission Objective Monster and its matching location!

Once one of the monsters from Scenarios Objective is defeated players get the rewards and bonuses as per general game rules, but the Monster Card is flipped over and otherwise remains on the Mission Objective spot to help remind the players that new Magic Flow Cubes cannot be placed there.

On the contrary the Mission Objective Location Card is removed from the Tavern Board enabling new Mission cards to come to its spot.

7) Flow cubes set up and Rules

This scenario will introduce to you the concept and mechanics of the Flow cubes.

Flow cubes will be placed on the map, on the Tavern Board, Mission Objective spaces and on the Characters themselves. They will effect the state of things as you play the game.

Flow cubes in the game are represented by the same game components as Magic Flow cubes, so do not confuse the two, as they are different.

a) Flow Cubes on the Map.

Every single time a Morahan's (purple) Mission card will be drawn you will place one PURPLE Flow cube on the matching location on the map. If a character passes or stops at the location with the Flow cube, the Flow cube/s immediately gets transferred on to the Character's card. If Characters are travelling as a company, they may choose which Character/s gain it.

b) Flow Cubes on the Character's card

Once a Character has a Flow Cube placed on top of its Character's card it will effect them. The effect will vary on the number of the Flow Cubes present.

- 1 Flow Cube** = In Preparation Phase player must draw 1 Kingdom card RANDOMLY from the top of the Kingdom cards deck (if able and if drawing cards).
- 2 Flow Cubes** = In Preparation Phase player must draw 2 Kingdom cards RANDOMLY from the top of the Kingdom cards deck (if able and if drawing cards).
- 3 Flow Cubes** = Character must pay 1 additional Magic Flow cube per Magic card they use.
- 4 Flow Cubes** = Character must pay 1 additional Physical Flow cube if using the Movement Action.
- 5 Flow Cubes** = Character cannot reroll in battle.
- 6 Flow Cubes** = Character DIES and thus Scenario is LOST.

**c) Flow Cubes on the Tavern Board**

At the beginning of the game and throughout the game players will be placing Flow Cubes on the Tavern Board as well. Once the Mission cards would to be placed on a location on the Tavern Board that contains Flow Cubes, all of the Flow Cubes are displaced and have to be moved on top of Character's cards, on top of EMPTY Mission Objective spaces or BOTH. In other words, players decide for themselves where they wish to place them.

At the start of the game after 2 Mission cards have already been placed on the Tavern Board place the following amount of Flow Cubes on the empty spots on the Tavern Board.

- 1 Flow cube on each empty spot in the First column of the Tavern Board.
- 2 Flow cubes on each empty spot in the Second column of the Tavern Board.
- 3 Flow cubes on each empty spot in the Third column of the Tavern Board.

**d) Flow Cubes on the EMPTY Mission Objective space**

Above the Tavern Board there is a Clairvoyant's King board that in this scenario is used as the Mission Objective Board. Throughout the game at certain moments a Monster Card from the Monster Objective Cards deck will be added on top of each EMPTY Mission Objective space.

As mentioned players may in order to avoid corruption by the flow "store" Magic Flow Cubes on top of these Empty spaces (only if EMPTY!). The number of cubes that can be stored here will vary depending on the level of the scenario.

- Easy** = 13 Flow cubes on 1st empty space, 12 Flow Cubes on the 2nd and 11 Flow Cubes on the 3rd
- Normal** = 11 Flow cubes on 1st empty space, 10 Flow Cubes on the 2nd and 9 Flow Cubes on the 3rd
- Hard** = 10 Flow cubes on 1st empty space, 9 Flow Cubes on the 2nd and 8 Flow Cubes on the 3rd

Once the Mission Objective Card will have to be placed on an Empty Objective space the number of Flow Cubes will determine which Mission Objective card will be taken from the Mission Objective Cards deck. Counting from the topmost card further down into the deck the more Flow Cubes there, the higher the chance that the Mission Objective Card will reveal a higher lvl Monster. EXAMPLE
